

Document Control Procedure

Project Name: Roommate Dashboard

Document ID: DocumentControlProcedure

Control Label: D0-v1-r1

Date: 2/4/2026

Prepared By: Group 6

Procedure Steps

1. A team member creates a new project artifact (example: Vision or Requirements).
2. The document is given a control label using the format D#-v#-r#.
3. The document is saved using the required naming convention.
4. The document is entered into the Document Control Log.
5. The document is exported to PDF format.
6. The PDF is stored in the team's artifact folder.
7. The document is linked on the HTML landing page.
8. If updates are made later, the revision number is increased, and the log is updated.
