

Requirements DB Evidence

Project Name: Roommate Dashboard

Document ID: RequirementsDBEvidence

Control Label: D0-v1-r1

Date: 2/4/2026

Prepared By: Group 6

Summary

This document provides evidence that requirements are captured and managed using automated tools rather than manual processes. The system uses an HTML form to capture requirement entries, a Flask backend to process submissions, and a SQLite database to persist requirements. The stored requirements are displayed automatically in a spreadsheet-style table view.

Evidence Included

```
○ (.venv) tammamahad@Mac roommate_requirements_db_tool % python app.py
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with stat
* Debugger is active!
* Debugger PIN: 634-025-024
```

Roommate Dashboard — Requirements DB

Automated requirement capture → storage (SQLite) → reporting (table view)
