

Testing Plan

Project Name: Roommate Dashboard

Document ID: TestingPlan

Control Label: D0-v1-r1

Date: 2/4/2026

Prepared By: Group 6

Testing Summary

Phase 1 testing focuses on validating requirements, documentation, and automation evidence. Since Phase 1 is focused on planning and requirements, testing will verify that artifacts are complete, traceable, and reproducible.

Phase 1 Tests

TP-001 Requirements review test: confirm requirements are clear, complete, and not ambiguous.

TP-002 Traceability test: confirm requirements map to user stories and use cases.

TP-003 HTML validation test: confirm HTML pages pass validation and follow required rules.

TP-004 Form submission test: confirm submitting a requirement saves it automatically.

TP-005 Database persistence test: confirm saved requirements remain after restarting the application.

TP-006 Reporting test: confirm the spreadsheet/table view displays stored requirements correctly.

TP-007 Document control compliance test: confirm all PDFs are labeled and logged correctly.
