This software and its documentation are provided **for educational and demonstration purposes only**. Permission is granted to view, use, and demonstrate this application solely within the context of the CSC 4110 course at Wayne State University.

Redistribution, commercial use, or deployment of this software outside the course context is **not permitted** without the express written consent of Group 6.

2. Introduction

Roommate Dashboard is a web-based application designed to help roommates manage their shared household responsibilities. The application provides a centralized platform for tracking bills, chores, and grocery lists, reducing conflict and improving communication between household members.

Key Features:

- Household creation and roommate invitations
- Shared bill tracking and bill splitting
- Chore assignment and rotation management
- Shared grocery list with purchase tracking
- Dashboard summary of all household responsibilities
- Activity log for transparency and dispute resolution

3. Getting Started

3.1 Creating an Account

1. Navigate to the Roommate Dashboard application URL.
2. Click **Sign Up** on the home screen.

3. Enter your full name, email address, and a secure password.
4. Click **Create Account**. You will be directed to your dashboard.

3.2 Creating a Household

1. From your dashboard, click **Create Household**.
2. Enter a household name (e.g., '123 Main St Apartment').
3. Click **Create**. You are now the Household Organizer.
4. Share the invite link or code with your roommates.

3.3 Joining an Existing Household

1. From your dashboard, click **Join Household**.
2. Enter the invite code provided by your Household Organizer.
3. Click **Join**. You will now see the shared household dashboard.

4. Using the Features

4.1 Bill Management

To add a shared bill, navigate to the **Bills** tab and click **Add Bill**. Enter the bill name, amount, and due date. Choose to split equally or by custom percentage. Each roommate can mark their portion as paid once settled.

4.2 Chore Management

Navigate to the **Chores** tab to add and assign chores. The Household Organizer can assign chores to specific roommates or enable automatic rotation. Roommates mark chores as complete when finished.

4.3 Grocery List

The shared **Grocery List** tab allows any roommate to add items. Items can be checked off as purchased. The list resets after a full shopping trip is marked complete.

4.4 Activity Log

All changes to bills, chores, and groceries are logged in the **Activity Log**. This provides a transparent record to help resolve any household disputes.

5. Indemnification Statement

This software is provided "**as is**" and "**as available**", without warranty of any kind, express or implied, including but not limited to the warranties of merchantability, fitness for a particular purpose, or non-infringement.

In no event shall Group 6, its members, or Wayne State University be liable for any claim, damages, or other liability — whether in an action of contract, tort, or otherwise — arising from, out of, or in

connection with the software or the use of the software.

Users assume full responsibility for any data entered into the system. Group 6 does not guarantee the accuracy, completeness, or reliability of any data stored or displayed by this application.

By using this application, the user agrees to indemnify and hold harmless Group 6 and Wayne State University from any and all claims arising from the user's use of the software.
